

(I ran the code multiple times and inputted different numbers for the prompts each time.)

Output #1

```
Run main x
C:\Users\Emma\PycharmProjects\FunctionAssignment\.venv\Scripts\python.exe C:\Users\Emma\PycharmProjects\FunctionAssignment\main.py
Enter a number for the radius: 10
314.16
Enter a number for the money: 20
Enter a decimal for the tax rate: 0.06
21.20
Enter a number for the Fahrenheit: 32
0.0000

Process finished with exit code 0
```

Output #2

```
Run main x
C:\Users\Emma\PycharmProjects\FunctionAssignment\.venv\Scripts\python.exe C:\Users\Emma\PycharmProjects\FunctionAssignment\main.py
Enter a number for the radius: 6
113.10
Enter a number for the money: 54
Enter a decimal for the tax rate: 0.04
56.16
Enter a number for the Fahrenheit: 80
26.6667

Process finished with exit code 0
```

Output #3

```
Run main x
C:\Users\Emma\PycharmProjects\FunctionAssignment\.venv\Scripts\python.exe C:\Users\Emma\PycharmProjects\FunctionAssignment\main.py
Enter a number for the radius: 24
1809.56
Enter a number for the money: 68
Enter a decimal for the tax rate: 0.08
73.44
Enter a number for the Fahrenheit: 73
22.7778

Process finished with exit code 0
|
```

Output #4

```
Run main x
C:\Users\Emma\PycharmProjects\FunctionAssignment\.venv\Scripts\python.exe C:\Users\Emma\PycharmProjects\FunctionAssignment\main.py
Enter a number for the radius: 2
12.57
Enter a number for the money: 68
Enter a decimal for the tax rate: 0.08
73.44
Enter a number for the Fahrenheit: 42
5.5556

Process finished with exit code 0
```

Output #5

```
Run main x
C:\Users\Emma\PycharmProjects\FunctionAssignment\.venv\Scripts\python.exe C:\Users\Emma\PycharmProjects\FunctionAssignment\main.py
Enter a number for the radius: 1
3.14
Enter a number for the money: 68
Enter a decimal for the tax rate: 0.08
73.44
Enter a number for the Fahrenheit: 42
5.5556

Process finished with exit code 0
|
